GARP- Growth at Reasonable Price

## INVESTMENT APPROACH

The key strategy is to hold on to winning ideas and weed out losers at regular intervals based on the concept of spatial – temporal analysis (i.e. assessment of business relative to its rank within the sector, across sectors at the current point in time as well as over historical periods) with very limited scope left for manual intervention.

## INVESTMENT OBJECTIVE

The objective is to generate sustainable long-term alpha by combining low-cost asset allocation with factor-based strategies in the Indian equity market. Using a core-satellite approach with broad market index exposure and rule-based factor funds like value, quality, momentum, and size, the strategy aims to deliver consistent alpha, manage risk effectively, and enhance returns across market cycles.

## INVESTMENT APPROACH

The investment approach targets mutual fund schemes that pass Elever's proprietary investability screens across categories. Schemes are assigned risk scores to construct 10 distinct portfolios based on predefined rules. Tactical signals guide scheme selection and portfolio allocation. Monthly tactical reviews determine portfolio weights in line with market conditions, while individual schemes continue to follow their independent review schedules to maintain strategic focus and optimize risk-adjusted outcomes.

# Brightseeds Advisors LLP - Xylem Maverick Strategy

July 2026

Small & Mid Cap

## INVESTMENT OBJECTIVE

To deliver long-term capital appreciation by investing in fundamentally strong businesses with the potential to generate 5x, 7x, or even 10x returns and not just incremental 10–15% gains. The focus is on identifying multi-baggers early, while maintaining a sharp discipline on capital preservation and long-term compounding.

## INVESTMENT APPROACH

The Xylem Maverick Strategy follows a concentrated, bottom-up approach built on three pillars: **Deep Research:** On-ground diligence, management insights, and forensic analysis to uncover multi-bagger opportunities. **Disciplined Execution:** Pyramiding winners, cutting laggards early, and managing allocations actively. **Risk-First Mindset:** Capital preservation through strict filters, margin of safety, and avoidance of poor governance or ESG risks.

## INVESTMENT OBJECTIVE

Primary Goal: Generate superior returns on a cross-cycle basis. When Aggressive: Focus on alpha generation; Core allocation can go as low as 30%, and Satellite (cyclicals, turnarounds, value) up to 70%. When Defensive: Capital preservation becomes priority; Core allocation can go up to 70%, Satellite down to 30%.

## INVESTMENT APPROACH

An aggressive stance when aiming for higher returns A defensive stance when the focus shifts to reducing risk This involves dynamic allocation between our Core and Satellite portfolios, adjusting weights based on market conditions and opportunities Executing this strategy requires insight, discipline, and a strong understanding of the forces driving different phases of the cycle.

## INVESTMENT OBJECTIVE

To create significant value over the long term by investing in deep value stocks, some of which may be relatively unknown small and mid-cap companies. On the verge of a turnaround due to various factors like change in management, demand-supply scenario, improved business environment, favorable government policies, among others. ## INVESTMENT OBJECTIVE

The investment objective of the Portfolio Manager is to endeavor to deliver superior risk adjusted returns for the Client. The Portfolio Manager seeks to deliver superior portfolio performance without taking undue risk thereby benefiting the Clients and helping them achieve their goals. This strategy aims to generate consistent absolute returns with moderate risk through disciplined and dynamic allocation in multiple asset classes such as equities, debt, gold/silver, REITs and INVITs based on the investor's risk profile and the prevailing market cycle.

## INVESTMENT APPROACH

The approach follows a dual framework of static allocation based on the investor's risk profile and dynamic allocation based on the attractiveness of each asset class. Asset allocation helps in diversifying risk because different asset classes exhibit different risk-return profile and bear low correlation to each other.

We focus on the NSE Midcap 150 universe to ensure liquidity, scalability, and institutional-grade governance. Stocks are ranked based on their relative market capitalization weight within the benchmark universe — a proxy for market leadership and capital flow strength. The highest-ranked securities are shortlisted for portfolio inclusion. Capital is allocated on an equal-weight basis to prevent over-concentration risk and enhance return dispersion.

## INVESTMENT OBJECTIVE

"The Investment Objective of this "Investment Strategy" is to create significant value over long term by investing in a concentrated portfolio of Indian equities which are significantly below intrinsic value and with strong longterm prospects.

## INVESTMENT APPROACH

Our approach is in-between the traditional growth and value styles – where we look for undervalued companies that operate differentiated business models with the potential for stable earnings growth in varying market conditions. However, we have bias towards Growth believing that earnings and free cash flow growth is the key long-term driver of stock performance. We believe in growth companies with proven business model with growth potential that is under-estimated by the market.

## INVESTMENT OBJECTIVE

This scheme invests in consistent High Dividend shares which are, to some extent, less prone to fall in the market as they have historically assured a minimum return in the form of dividends.

## INVESTMENT APPROACH

The companies where maximum wealth creation is possible. These companies tend to be under the radar names doing exceptionally well in their space, and yet having received very little attention from the public. The immediate performance of a business is not a cause for concern but rather how the company is positioning itself for the next 10-20 years and if they have a tangible plan towards generating solid long-term earnings.

Small & Mid Cap

## INVESTMENT OBJECTIVE

Higher returns from investment in Mid/ small cap with proprietary risk reduction strategy.

## INVESTMENT APPROACH

To invest in unique companies; the companies where maximum wealth creation is possible. These companies tend to be under the radar names doing exceptionally well in their space, and yet having received very little attention from the public. The immediate performance of a business is not a cause for concern but rather how the company is positioning itself for the next 10-20 years and if they have a tangible plan towards generating solid long-term earnings. When a stock is selected, no investments are made unless and until the team foresees a 200-300% appreciation opportunity. Hence, despite it being a High-Quality business, the stock should be available at the Right Price.

## INVESTMENT OBJECTIVE

To consistently identify the best investment opportunities from among thousands of publicly listed companies in India to generate strong absolute and relative returns over the long-term. We seek to achieve this by partnering for the long term with well-run companies at favourable valuations.

## INVESTMENT APPROACH

We have a fundamental research led, bottom-up approach to investing. The heart of our strategy is to buy companies that are compounding rapidly and selling at a significant discount to underlying business value. Our edge primarily comes from variant perception on smaller, undiscovered companies i.e. parts of the market that larger funds may not be focussed on and from our long-term orientation i.e. willingness to look beyond the volatility of the next few quarters and focus on what the years ahead hold for the business.

Multi Cap & Flexi Cap

## INVESTMENT OBJECTIVE

To deliver consistent outperformance over the benchmark, targeting an alpha of 4–5% across market cycles, measured over rolling 3+ year periods.

## INVESTMENT APPROACH

We seek businesses with strong growth, ideally supported by margin expansion over time. And when growth and governance align, our final discipline is price we aim to own these businesses only when they are available at a reasonable valuation. We believe portfolio outcomes are driven by a thoughtful combination of top-down sector positioning and bottom-up stock selection. This dual-layered approach ensures that risk management is embedded at the heart of our portfolio construction—not just through what we own, but also when and how we own it.

## INVESTMENT OBJECTIVE

This is a broad based portfolio strategy focusing on predominantly mid-cap strategy, with an exposure of around 65% to Mid-Cap stocks. Balance can be invested in large or select small cap, depending on market conditions. The aim is to hold around 20 stocks in the portfolio to provide reasonable diversification. The aim is to focus on bottom up stock picking across the sectors and generate compounding over the longer term.

## INVESTMENT APPROACH

The aim of equity strategy will be to predominantly build a portfolio of companies and identify the sectors that could benefit due to resurgent in demand and resultant demand supply imbalance, structural reforms, Government thrust, and companies benefiting out of new products, R&D, and/or related diversification or renewed thrust by the management.

## INVESTMENT OBJECTIVE

The focus of The Opportunistic strategy will be on industries and companies where growth visibility is high and remain invested in such industries and companies till the potential is largely explored. In case of stalwarts (mature businesses, large caps) across the industries, strategy will be to look for price ranges from where these stocks may bounce by 30- 50%, over a medium to long term time frame.

## INVESTMENT APPROACH

The Investment Approach is intended for high risk-taking investors who are willing to be patient with their investments, and to have exposure to a portfolio that may not initially move in tandem with broad market trends.

## INVESTMENT OBJECTIVE

Understanding business is more important to us than technical analysis and market algorithms. We focus more on people's economic behavior, changing social norms, their preferences than studying complex economic charts. We Focus on Basics.

## INVESTMENT APPROACH

Corporate Governance, Competitive Moat, Margin of Safety, Research & Development, Innovation, Asset light, Debt free and patience. The very foundation of our investment decisions is when we invest in a stock, we actually buy the business and not the stock.

## INVESTMENT OBJECTIVE

To deliver consistent, risk-adjusted outperformance over market indices by: Staying invested in the right sectors at the right time, Avoiding laggards and rotating capital effectively, Reducing volatility and drawdowns through dynamic cash allocation & caps.

## INVESTMENT APPROACH

The core philosophy is to identify high-momentum, trend-following sectors and invest in them through low-cost, transparent ETFs, while dynamically managing risk through allocation caps and cash buffers. This approach recognizes that sectors move in cycles—driven by macroeconomic trends, earnings momentum, policy actions, and investor sentiment.

The strategy seeks to participate meaningfully in rising markets while preserving capital during periods of weakness through disciplined exit mechanisms. Rather than forecasting market direction, we dynamically adapt to evolving market trends using a rules-based framework. By combining quality earnings with price confirmation, we aim to capture enduring winners, limit prolonged drawdowns, and deliver consistent wealth creation across full market cycles.

## INVESTMENT APPROACH

Our approach follows three steps: Quality, Trend, Execution. We identify fundamentally strong businesses with sustainable growth and scalable models, and invest when price trends confirm market conviction through momentum and relative strength. The portfolio is concentrated in high-conviction ideas, with allocations based on trend strength. Risk is managed through continuous monitoring and systematic exits, with capital rotated from weakening stocks to emerging leaders to keep the portfolio adaptive and forward-looking.

Multi Cap & Flexi Cap

## INVESTMENT OBJECTIVE

The key objective of the Narnolia Multi cap Strategy is to outperform Nifty 500 (the strategy's benchmark) while tracking Nifty 500 on a sustainable risk adjusted basis. This is done by managing the beta of the portfolio to Nifty 500 while adding alpha opportunistically based on a rigorous bottom up proprietary model. the portfolio construction is optimized to hit the singles and double as opposed to fours and sixes. This makes it very resilient especially in bearish and sideways markets by minimizing negative effects of deleveraging in such environment.

## INVESTMENT APPROACH

Stock filtering through proprietary model which considers fundamental, quantitative multiple years data/MCQ approach to buying. Momentum in earnings, Capital allocation strategy, Qualitative financial ratio/priority to resilience over high-beta.

## INVESTMENT OBJECTIVE

To invest in a concentrated portfolio of Large cap market leaders to create wealth over the long term while minimizing risk and investment life cycle cost

## INVESTMENT APPROACH

Very high amounts of capital and time are spent on having an informational / analytical edge, which dissipates fairly quickly and becomes easily available. Our edge is not informational or analytical, it is in having the temperament to buy when Mr. Market is moody and in having a long time horizon. Our method involves staying patiently in short term debt till opportunity presents itself, little/no transactions till exit, complete exit when it is time, repeat. Impatience and desire to avoid volatility on the part of others present the opportunity.

July 2026

Multi Cap

## INVESTMENT OBJECTIVE

The strategy aims to grow invested capital and create wealth over the long term by generating superior risk-adjusted returns. It follows a long only strategy by investing in equity and equity-linked instruments primarily across Midcap, small cap and micro-cap stocks, based on a Quantitative and Fundamental (Quantamental) research approach.

## INVESTMENT APPROACH

The quant, technical and fundamental framework enables switching between asset classes as per signals generated by quantitative, technical and fundamental models using economic, fundamental, technical and alternative indicators. Portfolio construction focuses on identifying companies with favorable growth outlook, attractive valuation risk-reward, improving business fundamentals, and positive earnings potential while maintaining disciplined position sizing and continuous risk monitoring in order to navigate the higher volatility associated with smaller-cap investing.

## INVESTMENT OBJECTIVE

The strategy aims to create wealth and foster capital growth by generating superior risk-adjusted returns across market cycles. It follows a Flexicap approach, by investing in equity or equity-linked instruments by identifying special opportunities available across the market capitalization spectrum using fundamental research.

## INVESTMENT APPROACH

The strategy would follow a highly concentrated investment approach that could have less correlation to the broader market dynamics. This investment approach may have concentration levels as high as up to 100% in one stock in special circumstances, depending upon the probability of positive outcomes in terms of the expected event and the expected returns.

July 2026

Hybrid

## INVESTMENT OBJECTIVE

Seeks to generate superior returns over a 5-year-plus horizon by combining outperforming equity mutual funds with alpha-generating direct stocks in a single structured portfolio. Equity allocation varies dynamically between 70% and 100%, with up to 30% in debt, gold, and alternatives for defensive positioning. Unlocks three distinct sources of alpha — fund selection, stock selection, and tactical asset allocation.

## INVESTMENT APPROACH

A curated mix of flexicap, contra, value, and thematic funds forms the MF sleeve, while the direct equity sleeve targets high-growth stocks with minimal overlap with fund holdings. Both the equity-debt mix and the stock-fund mix are adjusted actively based on market valuations. This dual-lever structure ensures participation across asset classes while managing downside through cycles.

July 2026

Multi Cap & Flexi Cap

## INVESTMENT OBJECTIVE

Seeks to create lasting wealth through a compact portfolio of quality businesses for investors with a 7-year-plus horizon and a high risk appetite. Market-cap agnostic and focused on earnings compounding, with up to 25% defensively allocated in overvalued markets. Targets sustained outperformance of the Nifty 50 over a full market cycle.

## INVESTMENT APPROACH

Stock selection follows a QQM framework — quantitative screeners, qualitative business checks, and a macro overlay — to identify great companies at fair prices. A core-satellite structure deploys roughly 60% in secular growth compounders and 40% in cyclical and tactical opportunities. Valuation signals inform defensive positioning when markets warrant caution.

July 2026

Hybrid

## INVESTMENT OBJECTIVE

Seeks to maximise long-term wealth creation over a 7-year-plus horizon through a high-equity portfolio with 80% in equity, 10% in debt and hybrids, and 10% in gold. Pursues the full compounding potential of Indian and global markets with gold as a hedge rather than a return dampener. Targets consistent outperformance over the Nifty 50 Hybrid Composite Debt 50:50 Index.

## INVESTMENT APPROACH

A core of large-cap and flexicap funds anchors the equity allocation, with a 15–20% mid and small-cap layer and up to 30% in thematic, sector, and international funds for tactical alpha. Minimal debt reflects the long horizon, allowing the portfolio to absorb short-term volatility. Active rebalancing keeps allocations on track through market cycles.

Multi Asset

## INVESTMENT OBJECTIVE

To beat inflation & generate equity-like returns by investing in a diversified multi asset portfolio comprising of instruments fetching fixed income, equities, gold & other asset classes and managing the associated risks through principles of asset allocation.

## INVESTMENT APPROACH

We use our proprietary quantitative models and parameters to create a portfolio comprising of asset classes, dynamically balanced for tactical asset allocation. Our investment model is constructed upon fixed income returns, interest rates, equity valuations & liquidity in the market. They are the key drivers of returns on equity, debt & commodities across market cycles. Portfolio manager can change or add more parameters to improvise the investment ideology.

## INVESTMENT OBJECTIVE

The fund will invest in established companies in specific sectors which are leading the migration of market share from the unorganised players to the organised players. The endeavor is to generate an absolute return of 200% over a 5-year time period.

## INVESTMENT APPROACH

The fund would be investing in well-established organised players who would be gaining market share from the unorganised players thus posting higher revenue growth rate than that of their industry. The high topline growth along with the benefits of operating leverage would help them record a superior earnings trajectory over the next decade.

Mid Cap

## INVESTMENT OBJECTIVE

The strategy seeks to generate superior risk adjusted returns, in relation to the broad market, by investing in fundamentally sound companies which have repurchased their own shares or where its promoters' have acquired additional shares at market prices.

## INVESTMENT APPROACH

The approach is to create and update (on a daily basis), a universe of companies where the promoter is increasing his stake at market prices either through creeping acquisitions or buyback route, where complete disclosures of stock purchases have been made to the exchanges, and that seems to be motivated either by an undervalued stock price or an impending improvement in business prospects that are still to be reflected in the market price.
