INVESTMENT OBJECTIVE

To create significant value over the long term by investing in deep value stocks, some of which may be relatively unknown small and mid-cap companies. Multi Asset

INVESTMENT OBJECTIVE

The investment objective of the Portfolio Manager is to endeavor to deliver superior risk adjusted returns for the Client. The Portfolio Manager seeks to deliver superior portfolio performance without taking undue risk thereby benefiting the Clients and helping them achieve their goals. This strategy aims to generate consistent absolute returns with moderate risk through disciplined and dynamic allocation in multiple asset classes such as equities, debt, gold/silver, REITs and INVITs based on the investor's risk profile and the prevailing market cycle.

INVESTMENT APPROACH

The approach follows a dual framework of static allocation based on the investor's risk profile and dynamic allocation based on the attractiveness of each asset class. Asset allocation helps in diversifying risk because different asset classes exhibit different risk-return profile and bear low correlation to each other.

INVESTMENT OBJECTIVE

"The Investment Objective of this "Investment Strategy" is to create significant value over long term by investing in a concentrated portfolio of Indian equities which are significantly below intrinsic value and with strong longterm prospects.

INVESTMENT APPROACH

Our approach is in-between the traditional growth and value styles – where we look for undervalued companies that operate differentiated business models with the potential for stable earnings growth in varying market conditions. However, we have bias towards Growth believing that earnings and free cash flow growth is the key long-term driver of stock performance. We believe in growth companies with proven business model with growth potential that is under-estimated by the market.

Thematic

INVESTMENT OBJECTIVE

This scheme invests in consistent High Dividend shares which are, to some extent, less prone to fall in the market as they have historically assured a minimum return in the form of dividends.

INVESTMENT APPROACH

The companies where maximum wealth creation is possible. These companies tend to be under the radar names doing exceptionally well in their space, and yet having received very little attention from the public. The immediate performance of a business is not a cause for concern but rather how the company is positioning itself for the next 10-20 years and if they have a tangible plan towards generating solid long-term earnings.

Small & Mid Cap

INVESTMENT OBJECTIVE

Higher returns from investment in Mid/ small cap with proprietary risk reduction strategy.

INVESTMENT APPROACH

To invest in unique companies; the companies where maximum wealth creation is possible. These companies tend to be under the radar names doing exceptionally well in their space, and yet having received very little attention from the public. The immediate performance of a business is not a cause for concern but rather how the company is positioning itself for the next 10-20 years and if they have a tangible plan towards generating solid long-term earnings. When a stock is selected, no investments are made unless and until the team foresees a 200-300% appreciation opportunity. Hence, despite it being a High-Quality business, the stock should be available at the Right Price.

Multi Cap & Flexi Cap

INVESTMENT OBJECTIVE

To deliver consistent outperformance over the benchmark, targeting an alpha of 4–5% across market cycles, measured over rolling 3+ year periods.

INVESTMENT APPROACH

We seek businesses with strong growth, ideally supported by margin expansion over time. And when growth and governance align, our final discipline is price we aim to own these businesses only when they are available at a reasonable valuation. We believe portfolio outcomes are driven by a thoughtful combination of top-down sector positioning and bottom-up stock selection. This dual-layered approach ensures that risk management is embedded at the heart of our portfolio construction—not just through what we own, but also when and how we own it.

INVESTMENT OBJECTIVE

To deliver consistent, risk-adjusted outperformance over market indices by: Staying invested in the right sectors at the right time, Avoiding laggards and rotating capital effectively, Reducing volatility and drawdowns through dynamic cash allocation & caps.

INVESTMENT APPROACH

The core philosophy is to identify high-momentum, trend-following sectors and invest in them through low-cost, transparent ETFs, while dynamically managing risk through allocation caps and cash buffers. This approach recognizes that sectors move in cycles—driven by macroeconomic trends, earnings momentum, policy actions, and investor sentiment.

Marathon Trends Advisory Pvt Ltd - Trend Following

August 2026

Multi Cap & Flexi Cap

INVESTMENT OBJECTIVE

The strategy seeks to participate meaningfully in rising markets while preserving capital during periods of weakness through disciplined exit mechanisms. Rather than forecasting market direction, we dynamically adapt to evolving market trends using a rules-based framework. By combining quality earnings with price confirmation, we aim to capture enduring winners, limit prolonged drawdowns, and deliver consistent wealth creation across full market cycles.

INVESTMENT APPROACH

Our approach follows three steps: Quality, Trend, Execution. We identify fundamentally strong businesses with sustainable growth and scalable models, and invest when price trends confirm market conviction through momentum and relative strength. The portfolio is concentrated in high-conviction ideas, with allocations based on trend strength. Risk is managed through continuous monitoring and systematic exits, with capital rotated from weakening stocks to emerging leaders to keep the portfolio adaptive and forward-looking.

Multi Cap & Flexi Cap

INVESTMENT OBJECTIVE

The key objective of the Narnolia Multi cap Strategy is to outperform Nifty 500 (the strategy's benchmark) while tracking Nifty 500 on a sustainable risk adjusted basis. This is done by managing the beta of the portfolio to Nifty 500 while adding alpha opportunistically based on a rigorous bottom up proprietary model. the portfolio construction is optimized to hit the singles and double as opposed to fours and sixes. This makes it very resilient especially in bearish and sideways markets by minimizing negative effects of deleveraging in such environment.

INVESTMENT APPROACH

Stock filtering through proprietary model which considers fundamental, quantitative multiple years data/MCQ approach to buying. Momentum in earnings, Capital allocation strategy, Qualitative financial ratio/priority to resilience over high-beta.

Multi Cap & Flexi Cap

INVESTMENT OBJECTIVE

The key objective of the Narnolia Multicap Strategy is to outperform Nifty 500 (the strategy's benchmark) while tracking Nifty 500 on a sustainable risk adjusted basis. This is done by managing the beta of the portfolio to Nifty 500 while adding alpha opportunistically based on a rigorous bottom up proprietary model. The portfolio construction is optimized to hit the singles and double as opposed to fours and sixes. This makes it very resilient especially in bearish and sideways markets by minimizing negative effects of deleveraging in such environment.

INVESTMENT APPROACH

Stock filtering through proprietary model which considers fundamental, quantitative multiple years data/MCQ approach to buying. Momentum in earnings, Capital allocation strategy, Qualitative financial ratio/priority to resilience over high-beta.

Large Cap

INVESTMENT OBJECTIVE

To invest in a concentrated portfolio of Large cap market leaders to create wealth over the long term while minimizing risk and investment life cycle cost

INVESTMENT APPROACH

Very high amounts of capital and time are spent on having an informational / analytical edge, which dissipates fairly quickly and becomes easily available. Our edge is not informational or analytical, it is in having the temperament to buy when Mr. Market is moody and in having a long time horizon. Our method involves staying patiently in short term debt till opportunity presents itself, little/no transactions till exit, complete exit when it is time, repeat. Impatience and desire to avoid volatility on the part of others present the opportunity.

Multi Cap

INVESTMENT OBJECTIVE

The strategy aims to grow invested capital and create wealth over the long term by generating superior risk-adjusted returns. It follows a long only strategy by investing in equity and equity-linked instruments primarily across Midcap, small cap and micro-cap stocks, based on a Quantitative and Fundamental (Quantamental) research approach.

INVESTMENT APPROACH

The quant, technical and fundamental framework enables switching between asset classes as per signals generated by quantitative, technical and fundamental models using economic, fundamental, technical and alternative indicators. Portfolio construction focuses on identifying companies with favorable growth outlook, attractive valuation risk-reward, improving business fundamentals, and positive earnings potential while maintaining disciplined position sizing and continuous risk monitoring in order to navigate the higher volatility associated with smaller-cap investing.

MF PMS

INVESTMENT OBJECTIVE

Seeks to generate superior returns over a 5-year-plus horizon by combining outperforming equity mutual funds with alpha-generating direct stocks in a single structured portfolio. Equity allocation varies dynamically between 70% and 100%, with up to 30% in debt, gold, and alternatives for defensive positioning. Unlocks three distinct sources of alpha — fund selection, stock selection, and tactical asset allocation.

INVESTMENT APPROACH

A curated mix of flexicap, contra, value, and thematic funds forms the MF sleeve, while the direct equity sleeve targets high-growth stocks with minimal overlap with fund holdings. Both the equity-debt mix and the stock-fund mix are adjusted actively based on market valuations. This dual-lever structure ensures participation across asset classes while managing downside through cycles.

Multi Cap & Flexi Cap

INVESTMENT OBJECTIVE

Seeks to create lasting wealth through a compact portfolio of quality businesses for investors with a 7-year-plus horizon and a high risk appetite. Market-cap agnostic and focused on earnings compounding, with up to 25% defensively allocated in overvalued markets. Targets sustained outperformance of the Nifty 50 over a full market cycle.

INVESTMENT APPROACH

Stock selection follows a QQM framework — quantitative screeners, qualitative business checks, and a macro overlay — to identify great companies at fair prices. A core-satellite structure deploys roughly 60% in secular growth compounders and 40% in cyclical and tactical opportunities. Valuation signals inform defensive positioning when markets warrant caution.

MF PMS

INVESTMENT OBJECTIVE

Seeks to deliver steady, inflation-beating returns over a 3–5 year horizon through a multi-asset portfolio with 60% in equity, 30% in debt and hybrids, and 10% in gold. Balances moderate growth with capital preservation. Targets consistent outperformance over the Nifty 50 Hybrid Composite Debt 50:50 Index.

INVESTMENT APPROACH

A stable core of large-cap, flexicap, value, and index funds anchors the portfolio, complemented by a 15–20% mid and small-cap allocation for incremental growth. Debt and hybrid funds provide downside cushion, while gold hedges against equity volatility. Active rebalancing helps navigate market cycles.

MF PMS

INVESTMENT OBJECTIVE

Seeks to maximise long-term wealth creation over a 7-year-plus horizon through a high-equity portfolio with 80% in equity, 10% in debt and hybrids, and 10% in gold. Pursues the full compounding potential of Indian and global markets with gold as a hedge rather than a return dampener. Targets consistent outperformance over the Nifty 50 Hybrid Composite Debt 50:50 Index.

INVESTMENT APPROACH

A core of large-cap and flexicap funds anchors the equity allocation, with a 15–20% mid and small-cap layer and up to 30% in thematic, sector, and international funds for tactical alpha. Minimal debt reflects the long horizon, allowing the portfolio to absorb short-term volatility. Active rebalancing keeps allocations on track through market cycles.

INVESTMENT APPROACH

Prudent Equity follows a bottom-up value investing approach to identify companies trading below their intrinsic value that provides significant upside potential with limited downside risk. Although our core principle remains towards capital protection, our strategy has proved to deliver outsized gains. Our strategy places focus on the unique strengths of the company, such as its overall financial strength, management, and its capital allocation policies.

INVESTMENT OBJECTIVE

The fund will invest in established companies in specific sectors which are leading the migration of market share from the unorganised players to the organised players. The endeavor is to generate an absolute return of 200% over a 5-year time period.

INVESTMENT APPROACH

The fund would be investing in well-established organised players who would be gaining market share from the unorganised players thus posting higher revenue growth rate than that of their industry. The high topline growth along with the benefits of operating leverage would help them record a superior earnings trajectory over the next decade.

Mid Cap

INVESTMENT OBJECTIVE

The strategy seeks to generate superior risk adjusted returns, in relation to the broad market, by investing in fundamentally sound companies which have repurchased their own shares or where its promoters' have acquired additional shares at market prices.

INVESTMENT APPROACH

The approach is to create and update (on a daily basis), a universe of companies where the promoter is increasing his stake at market prices either through creeping acquisitions or buyback route, where complete disclosures of stock purchases have been made to the exchanges, and that seems to be motivated either by an undervalued stock price or an impending improvement in business prospects that are still to be reflected in the market price.

INVESTMENT APPROACH

While we like companies delivering sustainable ROCE, we are also opportunistic in mid-cyclicals. Cyclicals should obviously offer more adjusted returns compared to structural ideas. Good management quality might give lower potential upsides, but also protects us from intrinsic and peculiar risks unique to a firm.
